

DATA TRANSFORMATION IN POWER BI.

FIRST TABLE TRANSFORMATION (MAIN) Fact Table

Steps performed

- Removed Duplicates = id
- Renamed and Remove duplicate Columns = Removed Duplicates user_id to user, order_id to order, inventory_item_id to inventory, created_at to date
- Changed Type = Renamed Columns date to date type
- Renamed Columns = Changed Type created_year to year, created_month to month, created_day to day
- Removed Columns = shipped_at, delivered_at, returned_at
- Renamed Columns= name to product Changed Type = Renamed Column total_sales to Currency.Type}, cost to Currency Type, profit to Currency.Type, margin to Percentage Type, verage_margin to Currency Type

SECOND TABLE TRANSFORMAT (DIMENSION)

dimension Table

- Changed Type= created_at to type date
- Renamed Columns = Changed Type {created_at to date
- Removed Duplicates = (Renamed Columns, state),
- Duplicated Column = (Removed Duplicates, state, state - Copy)
- Renamed Duplicated Columnstate – Copy to country_group
- Replaced São Paulo to Brazil
- Replaced = Rio de Janeiro to Brazil
- Replaced = Bahia to Brazil
- Replaced = Minas Gerais to Brazil
- Replaced = Paraná to Brazil
- Replaced =Beijing to China

Grouped countries into continients

- else if [country_group] = "Usa" then "North America"
- else if [country_group] = "Germany" then "Europe"
- else if [country_group] = "Spain" then "Europe"
- else if [country_group] = "Belgium" then "Europe"
- else if [country_group] = "France" then "Europe"
- else if [country_group] = "Poland" then "Europe"
- else if [country_group] = "United Kingdom" then "Europe"
- else if [country_group] = "Austria" then "Europe"
- else if [country_group] = "China" then "Asia"
- else if [country_group] = "Japan" then "Asia"
- else if [country_group] = "South Korea" then "Asia"
- else if [country_group] = "Nepal" then "Asia"
- else if [country_group] = "Australia" then "Oceania"

else "Others"),

- Renamed Column= Added Custom column to Continient ,country_group to Country, order_id to order, user_id to user
- Removed unnecessary Columns = id_1 to user_id_1
- Renamed Column = product_distribution_center_id to product_distribution_center and distribution_center_id to distribution_center
-
